SUMMARY

Motivated and enthusiastic Computer Science graduate with a solid foundation in full-stack development using Java, Spring Boot, and React.js. Experienced in building web applications through internships and personal projects, including REST API development, database management, and user interface design. Strong problem-solving skills, quick learner, and team player eager to contribute to innovative software solutions in a dynamic work environment.

TECHNICAL SKILLS

- **Languages:** C, C++, Java
- **Database:** MySQL, SQL Server, GitHub
- **Scripting:** HTML5, CSS, JavaScript
- **Tools:** Postman, Maven, Git

SOFT SKILLS

- **Communication:** Clear and concise verbal and written communication
- **Teamwork:** Collaborating effectively in group settings
- **Problem-Solving:** Approaching challenges with logical and creative solutions

INTERNSHIPS

Project Name:	Guest House Booking Application
Company:	 Rishabh Software (RISE Internship)
Role:	Full Stack Developer Intern
Duration:	January 2025 – Present
Description:	A full-stack web application for guest house booking, featuring real-time booking requests, admin approvals, and dashboards.
Tech Stack:	Java, Spring Boot, React.js, MySQL, Hibernate, JWT, Maven

Responsibilities:

- Developed REST APIs using Spring Boot and secured them with JWT.
- Built user and admin panels using React.js.
- Managed relational data with MySQL and Hibernate.
- Integrated email notifications and role-based access.
- Used Maven, Git, and Postman for build and testing.

PROJECTS

- **TalkSpace Chatting Application (Personal Project)**

Built using Next.js, shadcn/ui, Convex Database, @tanstack/react-query, react-hook-form

- Objective: A modern chatting application resembling Slack, featuring real-time messaging, authentication, and message history.
- Developed frontend with Next.js and used Convex Database for serverless functions and real-time data storage.
- Utilized shadcn/ui for responsive UI components.
- Employed @tanstack/react-query for API state management and react-hook-form for forms.
- Deployed on Vercel for continuous deployment.
- [GitHub Repository](#)

- **Guest House Booking Application (Personal Project)**

Full Stack Developer | Java, Spring Boot, React.js, MySQL

- Objective: A full-stack application to manage guest house bookings with real-time status tracking and role-based access.
- Developed RESTful APIs using Spring Boot for authentication, room management, and booking workflows.
- Built dynamic React.js frontend with separate user and admin dashboards.
- Used MySQL and Hibernate/JPA for data persistence and CRUD operations.
- Integrated JWT-based authentication and email notifications for booking confirmations and admin actions.
- Deployed locally using Maven for build and dependency management.
